Role	OS	Problem	Proposed Solution
Professor	All	Cannot upload large files for assignments; it could not be determined if this was a file size or pages issue.	The database uses a medium blob type for data storage. Changing this to a large blob may alleviate the issue.
Professor	All	Assignments start with a notification bubble even when no assignments are uploaded.	Front end code will need its logic checked.
Professor	All	QualityCheck trims the last character of the last word returned.	Do not perform the trim on the last word found.
Student	Windows	Updates do not update until logged out	Unknown.
Student	All	Teams shows user list for all teams	Remove the team page from students in the frontend code.
Both	All	Breadcrumbs do not link to pages.	Remove the breadcrumbs in the frontend code.
Professor	All	Manual student addition adds users with only a userId to the database.	Check the frontend code to make sure the correct API call is made. Check the backend API to ensure all fields are filled out properly.
Both	All	Professor uploaded assignments' due date time is off by time zone hours.	Backend code needs to accommodate for the Linux time shift.
Professor	All	Professor can save an assignment as a draft, but can't publish from the draft.	This may be an issue with how the code interacts with the database, else the backend code may not properly support this function in the API.
Professor	All	Can "send for review" after being in the review stage already.	The API method that changes the review stage needs to only be performed if the review stage of the requested document is false.
Both	All	Students see total number of reviews instead of total teams that have submitted reviews; this is related to the professor being	Fixing the error above should fix this error.

		able to submit for reviews multiple times. Professor can Send for Review multiple times and send for review to more teams.	
Professor	All	Professors' Download peer review instruction button doesn't work.	Ensure the frontend code properly references the API. Ensure the backend properly interacts with the database.
Student	All	Students can't click cancel when viewing the assignment solution.	Double check the frontend code.
Student	All	When the professor changes from solution to review, the state solution goes from completed back to due.	Double check the frontend code. Ensure the frontend code is using the proper API.
